

CHRIS REEDY

Media Systems Integrator

chris@chrisreedy.tv

Tyler, Texas

858-395-5790

I have 27 years of experience in broadcast, audio, video and network installation, operation, and support. I have designed, supervised and installed systems including the "last mile" fiber and data networks to 50+ story buildings, fiber distribution in collocations centers, and networks in multi floor office centers. In addition to network installation and support, I have designed, installed and maintained broadcast studios, sound and video systems in churches, colleges, courtrooms, and public auditoriums across the entire country.

Clear, confident communication, client satisfaction, and problem solving are important factors present in my work.

EMPLOYMENT

Contract Systems Integrator

2008-present

As a contract engineer I design, install, maintain, and operate network and media systems.

Horizon Christian Fellowship, San Diego Chief Audio Engineer, Technical Director

August 2003-June 2008

Chief engineer for the weekend and mid-week services. Completely re-designed, built and maintained a new video system for webcast and image magnification. Designed, deployed and operated a video conference link with several churches across the United States for the bi-annual Week of Prayer and Fasting, hosted by Horizon Christian Fellowship. Planning and oversight of special events.

Ivory Audio and Video, Rowlett, Texas Owner, Installer

1997 – July 2003

Design, install and service media systems in churches and courtrooms (video projection, sound, video, network).

1990-1997 – Worked as installation supervisor and installer for Ivory Audio.

ITDallas – Dallas Texas Head of Technical Services

May 1999 - April 2001

My functions were to design, draft, and supervise installation of the "last mile" phase of fiber optic Internet access, and design and installation of Local Area Networks and server rooms.

Lake Pointe Church, Rockwall, Texas Technical Director

Mid to late 90s

I started working as a part time media operator. I was hired to supervise the installation of a new media system in a 4500-seat building that the church acquired, renovated, and occupied. I built up and trained a volunteer staff to perform the functions required for a 3 camera broadcast quality image magnification service.

EDUCATION

Bachelor of Fine Arts in Technical Theatre

Southwest Texas State University – 1990
